

Rockwell Medical CEO Issues Press Release

May 23, 2018

WIXOM, Mich., May 23, 2018 (GLOBE NEWSWIRE) -- Rockwell Medical, Inc. (NASDAQ:RMTI), a fully-integrated specialty pharmaceutical company targeting end-stage renal disease (ESRD) and chronic kidney disease (CKD) with innovative products and services for the treatment of iron replacement, secondary hyperparathyroidism and hemodialysis, issued a letter to shareholders on behalf of Rob Chioini, President and Chief Executive Officer.

I submitted a response to The 8K that the Company issued this morning May 23, 2018, that I signed, Acc-no: 0001104659-18-035192, is true and accurate and represents correctly what has transpired. We have made appropriate disclosures to the Company's auditors, and we are following proper governance measures. As CEO, I have instructed the CFO to remain in his duties.

As the 8K states, on May 22, 2018, I called an emergency Board meeting for the purpose of discussing a shareholder demand letter requesting an independent investigation and alleging breaches of fiduciary duties and other possible violations of securities and other laws by various directors. The special meeting was called for the sole purpose of discussing various allegations of misconduct by directors and inform the full Board of steps the non-conflicted independent directors have taken to retain counsel and initiate an independent investigation. The call was convened and the directors whose conduct was the subject of the allegations of breaches of fiduciary duties, with securities counsel present, asserted the position that they voted to fire the CEO. As that action was not the purpose of the special meeting, the termination of the CEO, in the opinion of the non-conflicted independent directors, was not effective. The CEO, through counsel, has notified the SEC of the action taken by the directors whose conduct is discussed in the demand letter that gave rise to the investigation. The CEO continues to serve as the CEO consistent with the terms of his employment agreement. The internal investigation is proceeding under direction of the two non-conflicted independent directors Patrick Bagley and Ronald Boyd who have retained qualified and highly experienced counsel to conduct the investigation.

The Chairman of Board issued a second conflicting 8K this morning. Therein is referenced a Board meeting in which it is asserted that the CFO, Thomas Klema, was terminated. I have no information to suggest the governance requirements to call such a meeting were followed. The same 8K states that the Board created a Special Transition Committee comprised of Benjamin Wolin, Lisa Colleran, and John Cooper, to provide board-level oversight of the Company's strategic direction and day-to-day operations during the Company's transition. I have no information to suggest that the governance requirements for the creation of such a committee were followed.

I am informed that the independent investigation has commenced. Our expectation is that all directors will cooperate fully with the investigation. I remain committed fully to acting in the best interests of all shareholders.

About Rockwell Medical, Inc.

Rockwell Medical, Inc. ("Rockwell") is a fully-integrated pharmaceutical company targeting end-stage renal disease (ESRD) and chronic kidney disease (CKD) with innovative products and services for the treatment of iron deficiency, secondary hyperparathyroidism and hemodialysis.

Rockwell's FDA approved drug Triferic is indicated for iron replacement and maintenance of hemoglobin in hemodialysis patients suffering from anemia. Triferic delivers iron to patients during their regular dialysis treatment, using dialysate as the delivery mechanism. Triferic has demonstrated that it safely and effectively delivers sufficient iron to the bone marrow and maintains hemoglobin, without increasing iron stores (ferritin). Rockwell intends to market Triferic to hemodialysis patients in the U.S. dialysis market and globally.

Rockwell's FDA approved generic drug Calcitriol is indicated for treating secondary hyperparathyroidism in dialysis patients. Calcitriol (active vitamin D) injection is indicated in the management of hypocalcemia in patients undergoing chronic renal dialysis. It has been shown to significantly reduce elevated parathyroid hormone levels. Reduction of PTH has been shown to result in an improvement in renal osteodystrophy. Rockwell intends to market Calcitriol to hemodialysis patients in the U.S. dialysis market.

Rockwell is also an established manufacturer and leader in delivering high-quality hemodialysis concentrates/dialysates to dialysis providers and distributors in the U.S. and abroad. As one of the two major suppliers in the U.S., Rockwell's dialysis concentrate products are used to maintain human life by removing toxins and replacing critical nutrients in the dialysis patient's bloodstream. Rockwell has three U.S. manufacturing/distribution facilities.

Rockwell's novel renal drug therapies support disease management initiatives to improve the quality of life and care of dialysis patients and are intended to deliver safe and effective therapy, while decreasing drug administration costs and improving patient convenience. Rockwell has also obtained licenses for certain dialysis related drugs which we are developing and planning to market globally. Please visit www.rockwellmed.com for more information.

Forward-Looking Statement Disclaimer

Certain statements in this press release constitute "forward-looking statements" within the meaning of the federal securities laws, including, but not limited to, Rockwell's intention to sell and market Calcitriol and Triferic. Words such as "may," "might," "will," "should," "believe," "expect," "anticipate," "estimate," "continue," "could," "plan," "potential," "predict," "forecast," "project," "plan," "intend" or similar expressions, or statements regarding intent, belief, or current expectations, are forward-looking statements. While Rockwell believes these forward-looking statements are reasonable, undue reliance should not be placed on any such forward-looking statements, which are based on information available to us on the date of this release. These forward-looking statements are based upon current estimates and assumptions and are subject to various risks and uncertainties, (including without limitation those set forth in Rockwell's SEC filings), many of which are beyond our control, actual results could be materially different. Rockwell expressly disclaims any obligation to update or alter any statements whether as a result of new information, future events or otherwise, except as required by law.
