About Rockwell Medical

Rockwell Medical is a commercial-stage biopharmaceutical company developing and commercializing its next-generation parenteral iron technology platform, Ferric Pyrophosphate Citrate (FPC), which has the potential to lead transformative treatments for iron deficiency in multiple disease states, reduce healthcare costs and improve patients' lives. The Company has two FDA-approved therapies indicated for patients undergoing hemodialysis, which are the first two products developed from the FPC platform. Rockwell Medical is also advancing its FPC platform by developing FPC for the treatment of iron deficiency anemia in patients outside of dialysis, who are receiving intravenous medications in the home infusion setting. In addition, Rockwell Medical is one of two major suppliers of life-saving hemodialysis concentrate products to kidney dialysis clinics in the United States. For more information, visit www.RockwellMed.com

About NHIA

Founded in 1991, NHIA is the leading organization providing education, information, advocacy, and resources for the nation's home and alternate site infusion provider community and the manufacturers, suppliers, and service companies that support the field.

The NHIA is committed to meeting the needs of its growing and diverse membership—and to advocating on behalf of our members and the home based infusion patient. Home and alternate site infusion providers coordinate care through highly skilled professionals in a team that will often include the infusion pharmacist, infusion nurses, physician, and dietitian to help ensure the patient is receiving the best care possible.
